SUMMARY

Analytical Computer Science graduate with 5+ years of real-time operational experience inside one of the world's largest logistics networks. Skilled in Python, SQL, data pipelines, and automation with a strong track record of resolving time-sensitive issues, minimizing operational risk, and supporting high-pressure workflows. Adept at managing large datasets, generating reports, and collaborating with cross-functional teams.

EXPERIENCE

Outbound Problem Solver

Amazon Inc.

March 2020 - Present

- Resolved 1,000+ real-time operational exceptions weekly, ensuring minimal disruption to business operations.
- Analyzed shipment, routing, and system data to identify root causes and support rapid decision-making.
- Collaborated with operations, engineering, and support teams to coordinate resolutions.
- Supported extended and irregular shift schedules during peak periods.

Backend Engineer Intern

JPMorganChase

May 2025 - Aug 2025

- Integrated Kafka into a Spring Boot microservice to consume and deserialize high-volume transaction messages using a configurable topic and embedded Kafka test framework
- Connected service to an external REST Incentive API and incorporated it into transactional workflows
- Verified system behavior using Maven test suites and debugger-driven inspection, ensuring reliability across message ingestion, database operations, and external API interactions.

PROJECTS

Movie-to-Book Recommender

Technologies: Python, Sentence Transformers, Scikit-learn, NLP

Demo: <https://reelreads.onrender.com>

- Built an AI/ML recommendation system that suggests books similar to movies based on text similarity to guide new readers into novels they might enjoy
- Developed an ML recommendation engine using embeddings from 20k+ text records.
- Applied natural language processing techniques to compare movie and book descriptions for book suggestions

Transaction Processing System

Technologies: Java, Spring, SQL, REST API, Message Queueing

GitHub: github.com/brcaste/transaction-processing-system

- Built transaction validation, balance updates, and loaded data to a SQL database
- Connected the service to an external REST Incentive API and added a REST balance endpoint.

EDUCATION

Amazon Career Choice | Western Governors University

Bachelor of Science in Computer Science

April 2026

TECHNICAL SKILLS

- **Programming Languages:** C++, Python, Java, SQL, HTML, CSS, JavaScript
- **Frameworks and Libraries:** Spring Boot, Node.js, Scikit-learn, Sentence Transformers, Flutter, Dart, REST API
- **Tools:** Git, Bash, Shell, CLI, Firebase, Microsoft 365 tools
